**DETAILED ACTION**

***Allowable Subject Matter***

Claims 22-29 and 34-37, respectively renumbered as 1-12, are allowed.

The following is an examiner's statement of reasons for allowance:

Squilla et al (US 6,396,537) discloses an image capture unit for recording digital images that are controlled to transmit the recording to various devices as described in Column 6 Lines 20-50. Additionally, Hull et al (US 5,806,005) in further view of Yamane (US 5,842,131) discloses various features for the image capture unit. Hull et al discloses a wireless image transfer system that transfers data from the camera to the recording apparatus. It is noted in Figure 1 shows the wireless transmission as further stated Column 2 Lines 1-25 and thereby judges the information. The wireless transmission allow for more efficient transfers between camera and recording apparatus. Additionally, Hull discloses the transmission of data from the recording medium as described in Column 2 Lines 38+. This allows for proper information to be transmitted and prevents the re-transmitting of information. Yamane teaches a system with multiple wireless transmissions units the ability to judge if additional information is present on the recording medium as recited in Column 6 Lines 18+. However, the prior art of record fails to teach, disclose or suggest the following limitation:

“.. a control unit adapted to determine, using additional information corresponding to the digital image recorded on the recording medium, whether or not the digital image recorded on the recording medium is already transmitted to

**the external recording apparatus, the additional information being received from  
the external recording apparatus."**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
